Terms and Conditions

COSTING

This quotation is based on us being able to install your system as described without interruption. Should there be circumstances beyond our control which cause interruption to the installation process we will discuss with you the implications of such a delay. Should you decide to make any changes to the agreed installation within your 'cooling off' period, we will produce another full quotation which considers these changes. You will be given a further 'Cooling Off' period to consider this quotation. Should you wish to make any changes to the agreed installation after the 'Cooling Off' period has expired, again we will prepare a new quotation for you, but we reserve the right to charge for any reasonable costs we have incurred in working towards the original installation details. If, during the installation process, we come across any situation that we could not reasonably be expected to foresee, for example, remedial electrical or building work, we will discuss with you the implications and costs involved in rectifying the problem. Should you request any changes after the installation process has begun that involve additional cost, we will provide you with a quotation based on daily or hourly rates of our installers. The rate that would apply would be €37.50 per hour or €300 per day.

CONTRACT TERMS

Please read this contract carefully, and please contact us if you require further clarification. Commissioning Certificate will be provided upon completion and upon receipt of final payment and within 10 days of completion.

TIMETABLE FOR WORKS

If you decide to accept our quotation, we will contact you and arrange a mutually agreeable date to begin the installation. We will confirm this with you in writing. It usually takes us 1 day to carry out the installation including erection and removal of scaffolding (if required). Your installation will usually take place within 6 weeks of receiving your order subject to workload and availability of materials. We will contact you at the earliest opportunity should there be any delay in obtaining the goods or services required.

CANCELLATION RIGHTS

Following the signing of the contract you have a 'Cooling Off' period of seven working days, during which you may cancel the contract without penalty. If you cancel within this time, we will return any deposit you may have paid in full. If you cancel after this time, we may have to make reasonable charges based on costs we have incurred. Should you wish to cancel, we will provide you with a Cancellation Form. You must complete this or state in writing to us that you wish to cancel the contract. You should post the cancellation Form or your cancellation letter to us at the address on this quotation. We suggest that you send this cancellation notice by a form of recorded delivery. You may inform us by e-mail of your e-cancellation request by e-mailing the address on the quotation form. It is not our policy to begin work during the 'Cooling Off' period. If you require us to do so you must put this in writing to us. Should you take this course of action, and you subsequently decide to cancel the installation, you will be liable for any reasonable costs we have incurred up to the point of the cancellation.

PLANNING

Planning (where applicable) and compliance with local bylaws is the responsibility of the client or property owner.

IF YOU WISH TO ACCEPT THE QUOTATION

If you wish to accept the quotation, please read the contract carefully. If you are happy with the terms of the contract, please complete the ORDER FORM and return it to us tother with a deposit payment if we have requested one. We will then contact you to arrange the date for the installation. For solar installation we are governed by the SEAI Code of Practice for Solar PV Installations.
