

The teacher should receive an email stating: *"Thank you, we have received the information and your profile as a teacher is being assessed, this may take some time. You will receive an email when the process has been completed"*.

If you are approved, another email will be sent to you (it already does this).

If you are not approved, you should also receive an email, saying something like: *"We are very sorry, but we are currently unable to accept your application as a teacher. However, you are welcome to reapply after a period of time"*.

[This error continues] I don't know if it's an issue of not updating the database, but this teacher didn't exist, I created him again and when I accessed his profile from the Administrator Panel, there was data as if the teacher already existed. Money earned, classes given... and it was a new teacher (although with the same name as a deleted teacher). Beware of this.

The button to sort the list is very close to the top menu, and when you try to press the button to sort the list, it brings up this menu that you can see in the screenshot.

In this screenshot you can see how from the teacher profile, I have deactivated this type of classes, i.e. "Spanish in General" is now deactivated.

By the way, I could swear that the "V" and "X" icons are switched around.

From the student profile, I can continue to book "General Spanish" classes or buy another package of these classes. If I have it deactivated, it should disappear from the "Lessons" list, and when it is activated, it should reappear.

It is now 23:00 at night in Spain, which means that in the student's country, if he/she wanted to book a class now, he/she would only be able to start booking from 15:00 onwards, as there is a 12-hour difference with the teacher's time, which is the maximum margin a student has to book a class. Anything more than these 12-hours is time slots that are not allowed to be booked.

I don't know if we have managed to explain this. If not, we would do a Skype meeting on Wednesday, if possible, to try to finalise everything this week.

He is now a student living in a +8 hour time zone (the teacher still lives in +1). Well, as you can see, the calendar does not work.

From 10:00 to 14:00 for the teacher (see screenshot above), it is 17:00 to 21:00 for the student, this is fine.

Book Teacher

But... where is the rest of the teacher's hours, from 16:00 to 18:00? It would be from 23:00 to 01:00...

Lessons that have been booked and completed, but have not been confirmed by the student, are self-confirmed 48 hours after the lesson has finished.

Example: A lesson that has been booked on 01-11-2021, but after finishing that lesson (the lesson time has passed), the student has not confirmed that the lesson has finished. In this case, after 48 hours, the class will be auto-confirmed.

Requests for a change of time or date, if unanswered, are auto-cancelled and returned to the student's lesson package. This happens when there are only 12 hours left until the original time is reached.

Example: If the student has requested a time change for a class that is scheduled for tomorrow at 16:00, if the teacher does not reply, the class is auto-cancelled and returned to the student, with 4:00 (in the morning) as the deadline time/date.

Requests to change the time and date cannot be made if the date and time you want to change is only 12 hours before the class time.

Example: Currently you can see how in a teacher's profile (David Zurita) you can request a change of date/time of a class on 02-11 or 03-11 (today is 03-11), this could not be done (we cannot allow the teacher to request a change of a day after 02-11) or with a margin of only 12 hours (request changes at 13:00 when the class is at 16:00, for example).
