The space where you can choose the language you want to learn, covers a fundamental part of the banner, where you can see the name of the company and a sentence.

"Are you…" would be "Do you…", really?

I don't know if it's a server error, but in the email you receive when you have forgotten your password, the company logo does not appear.

When you want to set the new password in the "Reset Password" section, the new password only allows 8 characters. This is an old error that happened when you were registering, it was corrected there, but here the error is still there.
